

Mobi2SMS Pricing is now clear

Good morning everyone! While we are wishing for a Merry Christmas, I've got great news from Mobi2SMS.

The price displayed on Mobi2SMS website home page is now clear and easy to understand.

The minimum price for which you can buy SMS instantly for use is NGN2.40 per SMS.

You get this price when you are buying 10,000 SMS (that's 15,000 credits). However, we are saying that we can offer this price at any time we find that you are sending up to 10,000 SMS in count or pages per month.

At the page where you buy credits from PayStack, you get to see the price per SMS displayed and made clear for you under *Estimate*

.
Just in case you want to know how we handle DND SMS. We helped a client yesterday to only pay for SMS that she sent to NON-DND numbers.

While typing this post, she just called to send a repeat message. Would you like to reach us? Write to admin@mobi2sms.com to get started.

Meanwhile, we wish you Happy Holidays!
